TRANSLATING CULTURE INTO THE BUILT ENVIRONMENT

Custom furniture can play a key role in expressing organizational culture, reinforcing brand identity, and supporting how people work. Platform by Unisource Solutions offers tailored solutions that align furniture aesthetics and function with the unique needs of your workplace.

Whether incorporating brand standards or creating pieces that serve specific purposes, thoughtful customization can contribute to a more cohesive, comfortable, and productive environment. Beyond design, made-to-order solutions support spatial efficiency and adaptability, allowing organizations to optimize space while reflecting their values. Through intentional design, furniture becomes more than a backdrop - it becomes an active participant in workplace culture.

SUSTAINABILITY COMMITMENT

Platform is committed to supporting a healthier planet, reducing carbon impact, and working collectively toward meaningful environmental and social responsibility. Since 1987, Unisource Solutions has led with sustainable business practices, helping clients lower costs while minimizing environmental impact.

Our mission remains clear: raise awareness, reduce waste, and support net-zero goals—both ours and our clients'. Every piece we build is fabricated locally in California, meeting the highest environmental standards. As organizations evolve their sustainability strategies, Platform continues to be a reliable, responsible partner in achieving long-term impact.
